App Modernization in the Cloud.
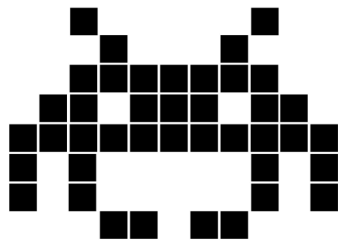

Let our consultants determine your best strategy to move to Azure.

✓ Rehost ✓ Integrate

✓ Rearchitect ✓ Migrate

✓ Replace

- Analyze
- Modernize
- Create
- Deploy

Scalable. Flexible. Secure.

Scalable
- Resources dedicated to the app can be changed rapidly as needed

Flexible
- Simple and quick configuration and deployment
- Faster development/deployment enables more frequent and quicker customer feedback

Cost Effective
- Pay as you go—no need for large capital investments
- Identify strategy quickly that best meets your business needs

Secure
- Data encrypted at rest and in transit
- PCI compliant
- HIPAA compliant

ILLUMINATION WORKS

www.illuminationworksllc.com

Not just "the cloud."
It's Azure.

- Data is secure and encrypted at all points—even approved for government use
- Multiple data centers for replication applications in case of disaster recovery
- High availability—most Azure services have an SLA of 99.95% or higher
- Most comprehensive cloud with many capabilities

Azure

Rehost—Lift and shift/replicate existing applications without redesign

Rearchitect—Break apart monolithic apps and reassemble relevant portions

Replace—New solution to replace legacy applications

Integrate—Hybrid solution to wrap legacy application in SOA layer for enterprise interaction

Migrate—Change underlying technologies

Engage ILW to kick start your App Modernization effort with a two-week assessment where we will:

1 Evaluate your business questions and the current state of your application

2 Assess your target needs

3 Define options and a high-level strategy for app modernization

4 Determine next steps
